### DETAILED ACTION

1. Claims 76-92, 95, 96, 106-111, 131, and 146 were pending in the instant application at the time of the issuance of the previous Office Action, mailed October 30, 2007. Via the latest response from the applicant, filed January 25, 2008, claim 109 is additionally cancelled. Therefore claims 76-92, 95, 96, 106-108, 110, 111, 131, and 146 remain pending and have been examined.

### EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

#### IN THE CLAIMS:

**Claim 76:** lines 29-33 are amended as follows:

determining means for determining whether the medium-  
related information from the reproducing-side medium-related  
~~information from the reproducing-side medium-related~~ information

reading means is consistent with the medium-related information  
detected by the detecting means; and

**Claim 76:** lines 45-46 are amended as follows:

means for providing second code ~~for providing code~~  
identical with said first code, and

**Claim 78:** lines 22-24 are amended as follows:

detecting means for detecting the device-related  
information added to the information ~~[[signs]]~~ signals from the information  
signal reading means;

**Claim 78:** lines 40-41 are amended as follows:

means for providing second code ~~for providing code~~  
identical with said first code, and

**Claim 79:** lines 14-25 of claim 25 are amended as follows:

determining means for determining whether the device-related information from the device-related information obtaining means is consistent with the device-related information detected ~~[[b]]~~ by the detecting means; and

reproducing control means for controlling reproduction of the information signals only when the determining means indicates that the device-related information from the device-related information obtaining means is consistent with the device-related information detected by the detecting means, wherein the device-related information added to the information signals is ~~and to which~~ superimposed on the information signals using a first code,

**Claim 80:** lines 1-4 are amended as follows:

Claim 80. An information signal processing system having a output device for ~~output~~ outputting information signals and a reproducing device for reproducing the information signals

**Claim 80:** lines 12-14 are amended as follows:

output means for outputting the information signals to which the device-related information has been added by the information adding means; and

**Claim 87:** line 9 is amended as follows:

means for providing second code ~~for providing code~~

**Claim 106:** lines 14-16 are amended as follows:

a detecting step of detecting the medium-related information added to the information signals ~~in the information signals~~ read by the information signal reading step;

***Allowable Subject Matter***

3. Claims 76-92, 95, 96, 106-108, 110, 111, 131, and 146 are allowed.

4. The following is an examiner's statement of reasons for allowance:

The closest prior art in the field does not teach the combination of features of the claimed invention, particularly including the steps of adding recording medium-related information from an area of recording medium separate from a recording area, or device related-information, to information signals, and subsequently recording the information signals to which the medium-related or device-related information has been added on a recording area of a recording medium, and then controlling playback utilization of the recorded information by detecting the medium-related information or device related information from the recorded information signals and comparing that to medium-related information read from the non-recording area of the recording medium or to device-related information associated with a playback device, all in the manner of the Applicant as disclosed in his Specification and as set forth in the independent claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
